

Aidan Mitchell

(760) 505-4654 | aidanpmitchell@ucsb.edu | <https://linkedin.com/in/aidanpmitchell> | <https://github.com/aidanpmitchell>

EXECUTIVE SUMMARY

Driven analyst with experience applying data analytics to real-world financial services problems. Brings a strong foundation in data cleaning, statistical modeling, and predictive analysis, supported by technical proficiency in SQL, Python, and R. Combines analytical problem-solving with clear communication and organizational skills developed through professional experience and community involvement.

EDUCATION

University of California, Santa Barbara

Bachelor of Science in Statistics & Data Science

Expected June 2026

Bachelor of Arts in Economics

Cumulative GPA: 3.7/4.0 | Dean's Honors

Study Abroad – Universidad Carlos III de Madrid (UC3M), Madrid, Spain

Fall 2025

PROFESSIONAL EXPERIENCE

Cetera Financial Group, San Diego, CA

June 2025-August 2025

Strategic Initiatives Intern

- Developed advisor attrition prediction models utilizing machine learning; resulting models maintain an AUROC of 0.94, allowing the firm to target at-risk advisors and minimize attrition.
- Built and automated multi-year Alteryx workflows to streamline data processing and reporting for business analytics teams.
- Contributed to the development of a competitive intelligence model using advisor headcount and movement data to quantify firm-level organic growth, departures, and acquisition-driven changes across competitors.

SKILLS

- **Technical:** SQL, Python, R, Excel, Alteryx, PowerPoint
- **Analytical:** Data cleaning, statistical modeling, predictive analysis, workflow automation
- **Professional:** Communication, collaboration, organization, adaptability, problem-solving

PROJECTS

Health Insurance Cost Prediction – Regression Analysis (R)

- Built a multiple linear regression model to predict health insurance charges using demographic and health factors (age, BMI, smoking status, number of children, region).
- Performed data cleaning, feature engineering with interaction terms, and residual diagnostics, achieving an adjusted R^2 of ~0.86 and identifying smoking and obesity as primary cost drivers to support risk assessment and pricing decisions.

[GitHub: Insurance Linear Regression](#)

Soda Consumer Preference Analysis – Factorial Experiment (R)

- Designed and analyzed a 3×2 blocked factorial experiment to evaluate how pouring method (side/center/can) and consumption method (straw vs. no straw) affect soda enjoyment ratings.
- Conducted hypothesis testing, interaction analysis, and model diagnostics, identifying no-straw consumption as a statistically significant driver of enjoyment and demonstrating experimental design to generate consumer behavior insights.

CERTIFICATIONS

- Alteryx Designer Core I (In Progress)
- SQL Associate Certification – DataCamp (In Progress)

LEADERSHIP & INVOLVEMENT

Sigma Phi Epsilon Fraternity – Active Member

2023-2026

- Contributed to planning and execution of chapter events, coordinating logistics and member participation.

Blaze Pizza – Shift Leader

2019-2023

- Led and trained team members in a fast-paced environment while balancing full-time coursework.
